(54) Title: PIZZA BOX WITH REMOVABLE PORTIONS USED AS REWARD TOKENS

(57) Abstract: A container such as a pizza box having one or more removable portions (46), which can be removed without substantially affecting the enclosing and/or strength properties of the container. The container blank has a central bottom panel (41) with at least one roll over side wall formed of an outer wall panel (48) with removable portions and an inner wall panel (49) that doubles over the outer wall portion to engage extension panels or tabs (8) of adjacent side walls, and has a hinged top panel lid (40). The removable portions (46) may be used for printing promotional material or as reward tokens offering special consideration for future purchases. The container also aims to provide a method of promoting products by way of a container having one or more removable portions and/or to provide a method of subsidising the cost of the container.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/AU03/00462

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos :
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos :
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos :
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

See supplemental sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-10, 12.

Remark on Protest

☐ The additional search fees were accompanied by the applicant's protest.

☒ No protest accompanied the payment of additional search fees.

PCT/AU03/00462

Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

Continuation of Box No: II

The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept. In coming to this conclusion the International Searching Authority has found that there are different inventions as follows:

1. Claims 1 to 10 and 12 are directed to a container (or container blank) including the features of a "pizza" box of two main panels with a joining panel between them, a plurality of side walls depending from the main panels wherein one or more of the side walls have an outer wall panel and an inner wall panel to form a roll-over wall, and the roll-over wall having one or more removable portions. It is considered that the features of the "pizza" box and the one or more removable portions comprises a first "special technical feature".
2. Claim 11 is also directed to a container including features of a "pizza" box of two main panels with a joining panel between them, a plurality of side walls depending from the main panels wherein one or more of the side walls have an outer wall panel and an inner wall panel to form a roll-over wall, and one or more of the inner wall panels include a lateral extension which may be folded to form a chamber adjacent a corner. It is considered that the features of the "pizza" box and the lateral extension which is folded to form a chamber comprises a second "special technical feature".
3. Claims 13 to 16 are directed to a method of promoting goods and/or services including providing a container having one or more removable portions, and providing markings on the removable portions indicating promotional advertising, discounts, prizes, special offers or the like. It is considered that the features of the method of promoting goods and/or services by providing a container with one or more removable portions, and providing markings on the removable portions comprises a third "special technical feature".
4. Claim 17 is directed to a method of decreasing overheads of a business providing goods in a container, the method including: providing one or more removable portions with the container; obtaining payment from one or more other businesses to advertise other goods and/or services; and providing markings on the removable portions indicating the advertising of the other businesses thereon whereby the cost of the advertising and at least some of the overhead associated with the production of the container may be offset by the payment obtained from the other businesses. It is considered that the features of the method of decreasing overheads of a business providing goods in a container comprises a fourth "special technical feature".

These groups are not so linked as to form a single general inventive concept, that is, they do not have any common inventive features, which define a contribution over the prior art. The common concept linking together some of these groups of claims is a container with one or more removable portions. However this concept is not novel in the light of prior art information contained in the following documents:

- (a) US 5074462 A (COUNTEE JR.) 24 December 1991
- (b) US 4108350 A (FORBES JR.) 22 August 1978
- (c) US 6027018 A (YOCUM) 22 February 2000

Therefore these claims lack unity a posteriori.
